

# Assignments

## Task 1: *Web Scraping*

Complete the total scraping of Internshala Website -

<https://internshala.com/internships/>

Here is the Colab file , create a copy of the Notebook (See at the top , you will find the option to Copy it) :  Day2\_Web Scrap.ipynb

### Check Points:

- Find Duration of each individual internship
- All the information (Profile, Company Name, Location, Stipend, Duration, Application Link) u have got till now create a dataframe out of it using pandas
- Save the dataframe in CSV and write a code automatically it can be downloaded
- Handle the url while filtering any location (just you did for profile)
- Create a general Code to fetch data from any number of page : 😊

☐ Remember :

<https://internshala.com/internships/analytics-internship/page-1/> and

<https://internshala.com/internships/analytics-internship/>

both are same
